Notes & Links

- * Students who meet the full-term reporting criteria in at least one of the terms during an academic year are included in this query.
- * The full-term reporting criteria is defined as student headcount status **STD7** of A,B,C,E,F,G or H. This definition was changed from a previous headcount definition (student headcount status **STD7** of A, B, C, or F) due to exigencies of the pandemic that led to a known, definable undercount of real students, starting in Spring 2020. College adjustments to an alternative instructional modality to support flexibility in delivering virtual instruction as local and statewide conditions interacted with pre-pandemic definitions of headcount, undercounting students at a number of colleges throughout the system, adversely affecting headcount and enrollment reports. In the past, students enrolled in these alternative instructional modalities had been very limited and were not included in the CCCC definition. To address this issue, the CCCC has updated the headcount definition. This new headcount definition has been applied to all reports on DataMart.
- * For Annual search - If a college hasn't submitted its spring data for a year then data for other terms in that year for that college is not included in the result.
- * To determine whether colleges' submissions are complete for a particular term or year, select the college wide search and select the term or year of interest and the previous year or identical term of the previous year. Once you view report, any college missing data in the year or term of interest have not yet completed their submission.
