*The Compton Community College District is committed to providing an educational and employment environment in which no person is subjected to discrimination on the basis of actual or perceived race, color, ancestry, national origin, religion, creed, age (over 40), disability (mental or physical), sex, gender (including pregnancy and childbirth), sexual orientation, gender identity, gender expression, medical condition, genetic information, marital status, military and veteran status, or retaliation; or on any other basis as required by state and federal law.*

# Introduction

The Compton College Annual Fact Book is a reference source containing trend data about students, student outcomes, and instructional programs and services. The data in the Fact Book provides background information to facilitate policy analysis and decision making. It should be a useful tool in college and department planning, grant preparation, and in the accreditation process. The reader may use the information provided to evaluate programs and practices as well as visualize the trends that affect Compton College's current and future operations.

The 2017-18 Annual Fact Book presents tables and graphs that contain enrollment trends for the last five academic years. Each pie chart represents enrollment for the most recent academic year. Information has been disaggregated by age, gender, and ethnicity where appropriate.

This is the last year that Compton College will produce the Annual Fact Book in a written format. The College is transitioning to an online dashboard platform called Tableau. The 2018-19 Annual Fact Book (due in February 2020) will be published in Tableau. It will still be available to the public and training will be provided to Compton College stakeholders about how to access this resource.

## Data Sources

Demographic and enrollment data for Compton College students was provided by the California Community College Chancellor's Office. Some data in the Special Programs section was extracted from the college's student database. In addition, data from the National Student Clearinghouse was used to provide transfer destination information. The National Student Clearinghouse is a national, non-profit organization that offers access to enrollment and degree records.

# Student Enrollment Trends

# Age

Compton College’s student population predominantly consists of young adults. In 2017-18, 62% of enrolled students were 24 years of age or younger. Working adults ages 25-44 comprised 33% of enrolled students while 5% of students were ages 45 and older. Although enrollment for almost every age group (except students aged 20-24) has declined when comparing 2017-18 to 2016-17, these differences are less than 2% for every age group below the age of 45 years old.

# Ethnicity

Latino students represent the largest ethnic group on campus, comprising 60% of the student population in 2017-18, a 21% increase compared to five years earlier. Other ethnic groups' enrollment has declined by various degrees over the past five years, although there is higher enrollment among Asian and White students when comparing 2017-18 to 2016-17.

# Age by Ethnicity

Most ethnic groups at Compton College include students from various age groups, although there are specific tendencies among both African American and Latino students. African American students are more likely to be older, while Latino students are more likely to be traditional college ages. Less pronounced variability is found among other ethnic groups.

# Gender

Compton College has a proportionally large female student population. In 2017-18, 63% of students were female while 37% were male. The gender gap in enrollment has been relatively stable over the past five years.

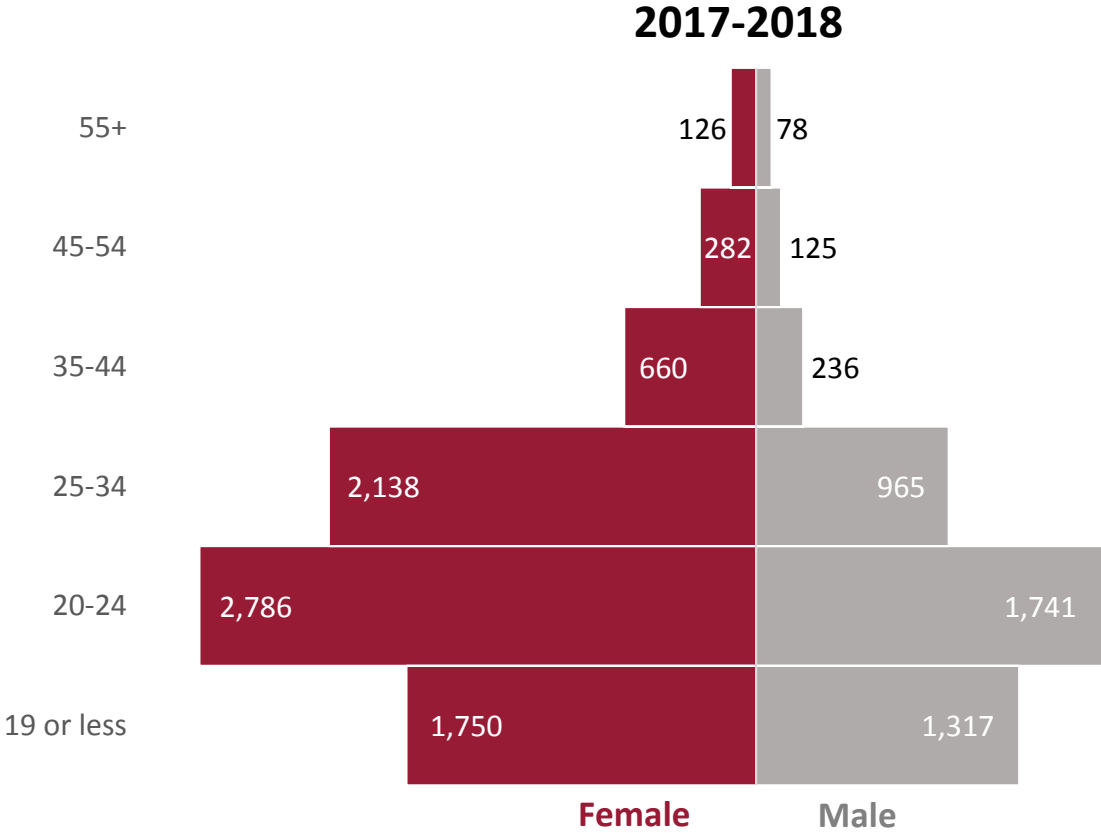

## 2017-2018

	2013-14	2014-15	2015-16	2016-17	2017-18
<b>Female</b>	8,016	7,663	7,247	7,989	7,742

<b>Total</b>	12,655	12,159	11,602	12,403	12,205

# Gender by Age

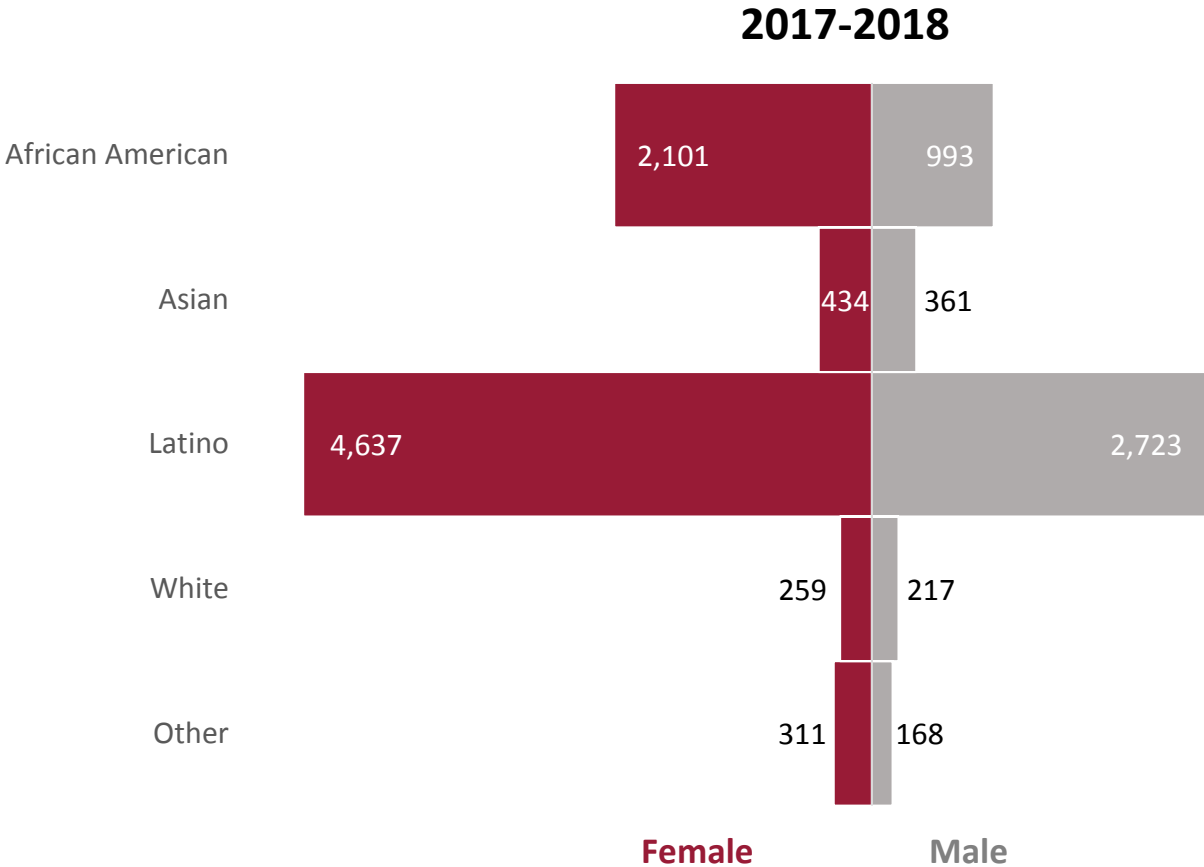

Gender differences among students enrolled in 2017-18 were present in all age groups. However, differences larger than the overall rate of 63% female students and 37% male students were only present among older age groups (25-34, 35-44, and 45-54). The 19 or less age group is the most proportional among male and female students, although it still reflects the overall gender gap in enrollment.

	19 or less	20-24	25-34	35-44	45-54	55+
<b>Female</b>	57%	62%	69%	74%	69%	62%
<b>Male</b>	43%	38%	31%	26%	31%	38%

# Gender by Ethnicity

The overall gender gap in enrollment is also represented among each ethnic group. Among Asian and White students, male and female student enrollment is slightly more proportional than the overall student body. Students in all other ethnic groups display proportions similar to the student body (63% females and 37% males), with male and female enrollment among African American students slightly less proportional than the overall rates.

	African American	Asian	Latino	White	Other
<b>Female</b>	68%	55%	63%	54%	65%
<b>Male</b>	32%	45%	37%	46%	35%

# Day and Evening

In Fall 2017, approximately 72% of students enrolled in at least one daytime course, while 18% enrolled exclusively in evening courses. Both daytime and evening enrollment have slightly decreased over the past five years, although irregular enrollment (which includes distance education) has increased by 17% compared to five years earlier.

# Residency

The number of Compton College students living within the Compton Community College District decreased by 5% compared to the previous year. In 2017-18, 43% of students enrolled at Compton College lived within the Compton Community College District, 34% of students resided within 7.5 miles of the college, and 23% lived beyond a 7.5-mile radius of the college.

The Compton Community College District encompasses the cities of Compton, Lynwood, and Paramount.

# Feeder High Schools

A large number of Compton’s enrolled students previously attended local high schools within the Compton Community College District. The top high schools in terms of 2017-18 student enrollment are Dominguez, Compton, Lynwood, Paramount, and Centennial high schools. Although it is not located within the Compton Community College District boundaries, Jordan Senior High School also provides a substantial proportion of enrollment.

# Special Programs

# CalWORKs

2017-2018

CalWORKs is the community portion of the California Work Opportunity and Responsibility to Kids Act. CalWORKs funds assist single parents who are receiving Temporary Assistance for Needy Families (TANF), and those transitioning off welfare. It helps students achieve long-term self-sufficiency through coordinated student services. Approximately 2% of the student population participated in CalWORKs. In the last five years, the number of CalWORKs participants has steadily decreased. However, this coincides with a statewide decrease in CalWORKs participation.

# Disabled Student Programs & Services

About 3% of Compton College students have a registered disability. The most common disabilities were psychological disabilities (20% of DSPS students) followed by mobility impairment (11%). In 2016-17, students with Attention Deficit Hyperactivity Disorder (ADHD) and students on the autism spectrum were reported for the first time. In 2017-18, 6% of Compton College students with a registered disability reported having ADHD, while 2% reported being on the autism spectrum.

# Extended Opportunity Programs & Services

The Extended Opportunity Programs and Services (EOPS) program is designed to assist low-income and educationally disadvantaged students in achieving their educational goals at Compton College. It provides eligible students with support services in the areas of counseling, peer support, financial assistance, transferring and tutorial services. CARE is a single parent support program for EOPS students. Approximately 7% of Compton students are EOPS and/or CARE participants, although the number of students who participated in EOPS and CARE decreased by 12% compared to the previous year.

# Student Athletes - Females

Overall female student athletic participation has declined compared to the previous year, and there were decreases in participation for each listed sport. The most popular sports among female students in 2017-18 were soccer, softball, and basketball. Cross Country courses were not offered during the 2017-18 academic year.

# Financial Aid

# Award Type

In 2017-18, 44% of all Compton College students received financial aid, a decrease of almost two percentage points compared to the previous year. The most widely-used Financial Aid program was the California College Promise Grant, formerly known as the Board of Governor’s Fee Waiver (BOGW)— with 43% of all Compton students receiving the award. In 2017-18, there was nearly a two percentage point decrease in the proportion of all Compton College students who were College Promise Grant recipients.

# Success and Retention

# Success and Retention Rates

## Success Rate

The success rate is the percentage of students who receive an A, B, C, or Pass as a final course grade out of all students enrolled as of the census date.

Compton has an ACCJC Institution-Set Standard of 58% and an Institution-Set aspirational goal of 72% by the year 2019-2020.

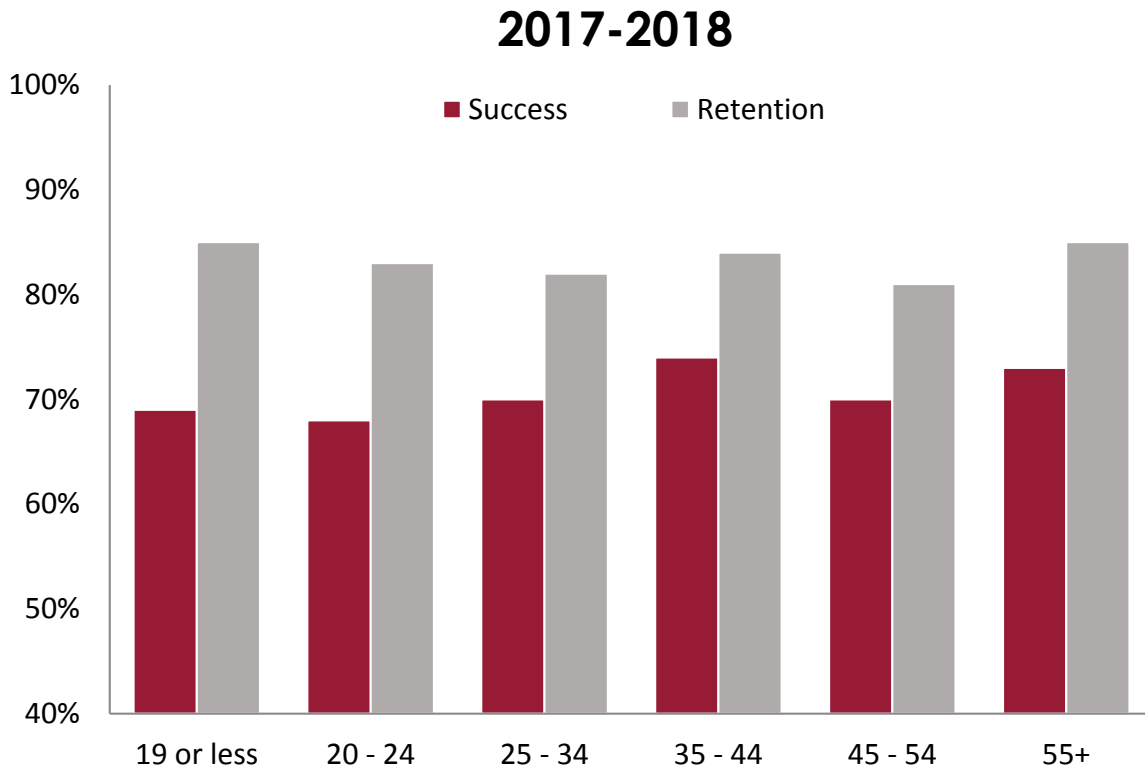

## Retention Rate

The retention rate is the percentage of students who remain enrolled through the end of a course out of all students enrolled on census date. In essence, it is the percentage of students who did not drop late or withdraw.

Compton does not have an ACCJC Institution-Set Standard or Institution-Set aspirational goal for retention rate.

# Success and Retention Rates by Age

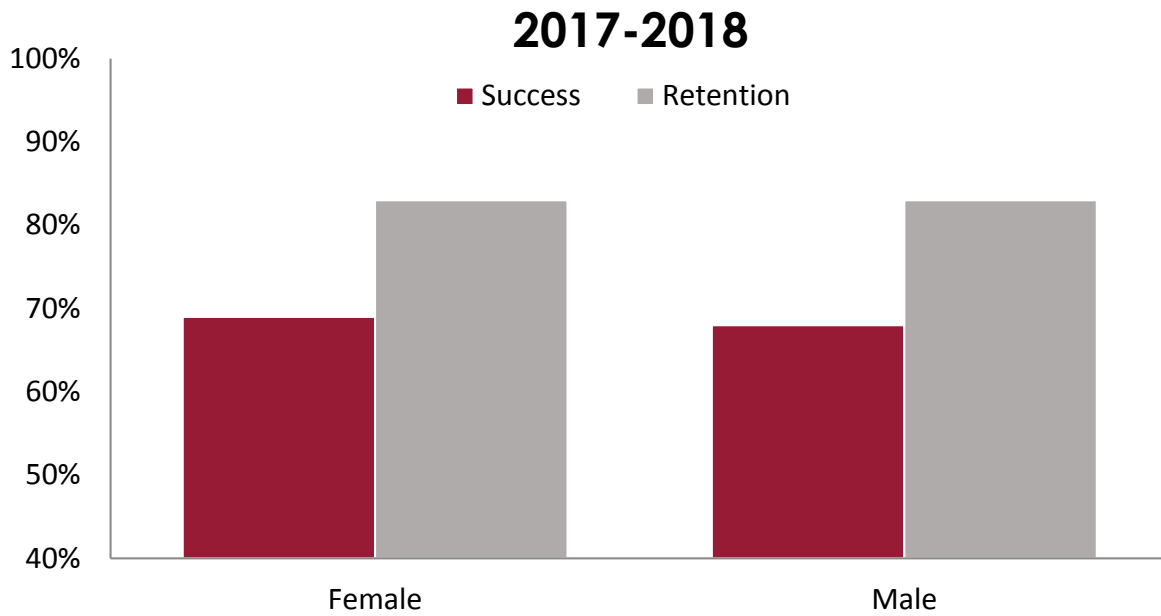

In 2017-18, students of all age groups exceeded the institution-set standard of a 58% success rate but have not met the institution-set goal of a 72% success rate. Students in all groups above the age of 24 had a success rate of 70% or above, while students age 19 or younger consistently display the highest retention rates across the past five years.

# Success and Retention Rates by Gender

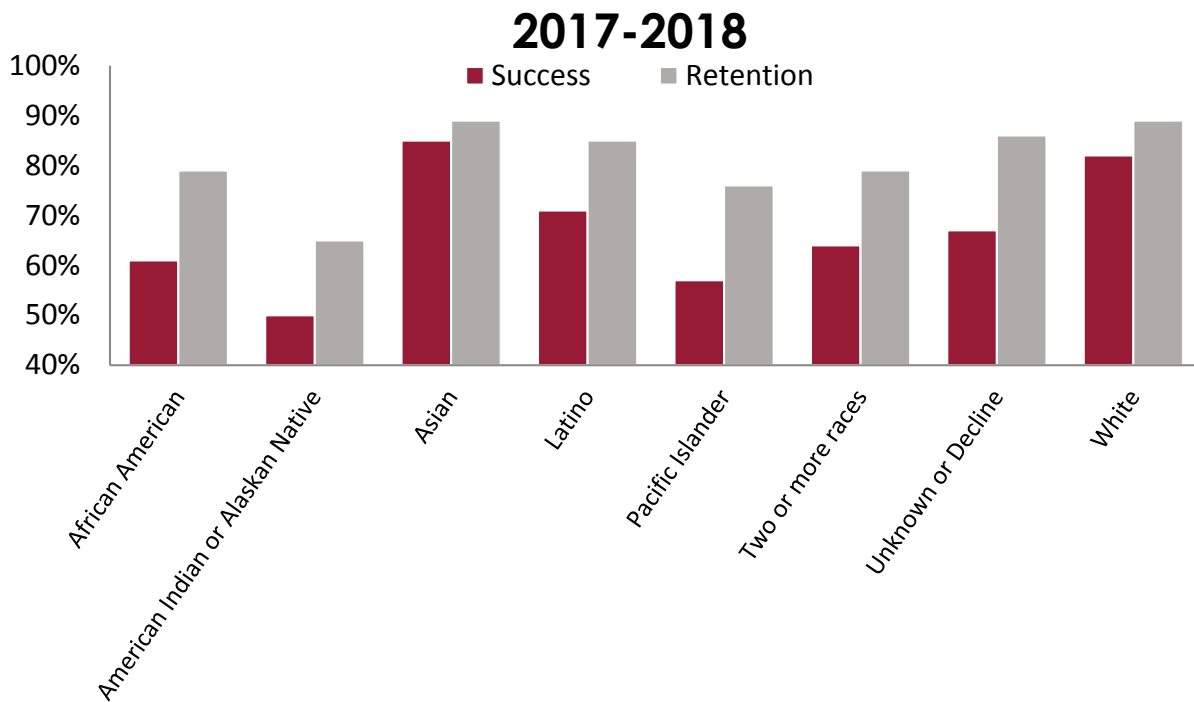

The five-year average success rate for both female and male students is 66%. Although there have been slight differences in female and male success rates, these rates have been similar in recent years. In 2017-18, the average success rate for female students was 69% while the average success rate for male students was 68%, although both groups have improved compared to five years earlier.

# Success and Retention Rates by Ethnicity

The 2017-18 success rates varied among ethnic groups, ranging from an average of 50% among American Indian or Alaskan Native students to an average of 85% among Asian students. Smaller groups show a wider range of variability in success rates across the years, but the data indicates some groups may be disproportionately impacted in 2017-18. Retention rates show a narrower range of variation among most groups. Despite these gaps in student outcomes, most groups' rates have improved over the last five years, with the exception of American Indian or Alaskan Natives and Pacific Islanders, who are also among the groups that may be disproportionately impacted.

# Success and Retention Rates by Course Type

The lowest success and retention rates were among the Basic Skills and Degree-Applicable course types, which were approximately 10 percentage points below the success rate average and 6 percentage points below the retention rate average. Transfer-level success and retention rates (71% and 85%, respectively) are closer to the average, while the success and retention rates for CTE courses (71% and 87% respectively) are higher in comparison to all other course types.

# Student Outcomes

# Persistence

Student persistence refers to the continuous enrollment of students over several terms. Persistence rates are based on the Fall cohort for a given academic year, tracking Fall and Spring enrollment over the following four semesters. For these Fall cohorts, persistence rates to the 2<sup>nd</sup> and 3<sup>rd</sup> semesters are somewhat lower in Fall 2017 compared to the previous five years.

## Student Persistence over Four Semesters Fall 2013 to Fall 2017

\*CCCCO MIS enrollment data for Fall 2017 students' 3<sup>rd</sup> Semester was not available at the time of this report, and an estimation using local enrollment data is provided instead.

# Persistence – First-Time Students

Among the Fall 2017 first-time, full-time cohort of students, 2<sup>nd</sup> and 3<sup>rd</sup> semester persistence rates have increased when compared to the previous year’s cohort. These first-time full-time cohorts also continue to exhibit consistently higher persistence rates than the Fall cohorts which include students of all enrollment types.

# Degrees and Certificates

In 2017-18, 635 degrees and 101 certificates were awarded at Compton College, which exceeded the institution set standards for degrees and certificates. Compared to five years earlier, there has been over a 100% increase in the number of degrees and certificates awarded at Compton College. The number of Associate degrees awarded has steadily increased, while the number of certificates awarded has somewhat decreased after the large increase seen in 2015-16 and 2016-17.
