# Compton College Students –
# Safe Return to Campus Survey

May 24, 2021

In May 2021, Compton College surveyed all current students about their beliefs regarding returning to campus for in-person instruction. 600 students responded (approximately 16% response rate). Surveys were administered via email through CRM Advise, and administered for a two-week period with one reminder email.

**Are you currently taking classes virtually?**

Response	Count
Yes, all my classes are online.	561
My classes are online and in-person.	34
All my classes are in-person.	2
I am not taking classes right now	3

When Compton College opens up to in-person classes, what classes do you want to take?

Answer	Count
All virtual classes (online)	281
Both virtual and in-person classes	200
Only in-person classes	56
Not applicable: I do not have any more classes to take at Compton College	31

Have you been vaccinated for COVID-19?

Answer	Count
Yes	279
No, and I do not plan to get vaccinated.	163
I prefer not to answer.	71
No, but I plan to get vaccinated	87

Which of the following challenges or issues have you faced at any time while completing your coursework since March 2020 due to COVID-19? Check all that apply.

Challenge	Count
Wi-fi connection is unstable	209
Printing, copying or scanning documents	185
Safety & health of my family	145
Needed to work	140
Lack of proper space to participate in class/do ho...	138
Psychological/mental health concerns	131
Safety & health of myself	130
Working collaboratively with other students	115
Childcare	98
Accessing the technology and/or other devices or e...	96
Other	67
Accessing Canvas	58
Lack of food	50
Experiencing housing insecurity/homelessness	49
Need wifi connection	45
Other	11
Other	9

Other responses:

No issues (23 students)

Online is better for student, "don't have to drive to class," "Online classes make me feel safe," "I have found it more convenient having all online classes because I work full time and I also have a daughter to care for. I will only take online courses from now on." (9)

No work/lack of income/money (5)

Perceptions that teachers struggle with online format, "teachers not fully knowing how to use canvas," "PROFESSORS not having stable wifi or not knowing how to navigate canvas" (4)

Issues with Financial Aid (3)

not feeling connection to the class online/personal interaction (3)

Personal/family health issues (3)

Labs are all virtual meaning students get no actual lab experience (2)

Stress (1)

Difficulty contacting support on campus (1)

Struggling to catch with homework and tests. Professors are requiring more from us than normally in face to face classes.
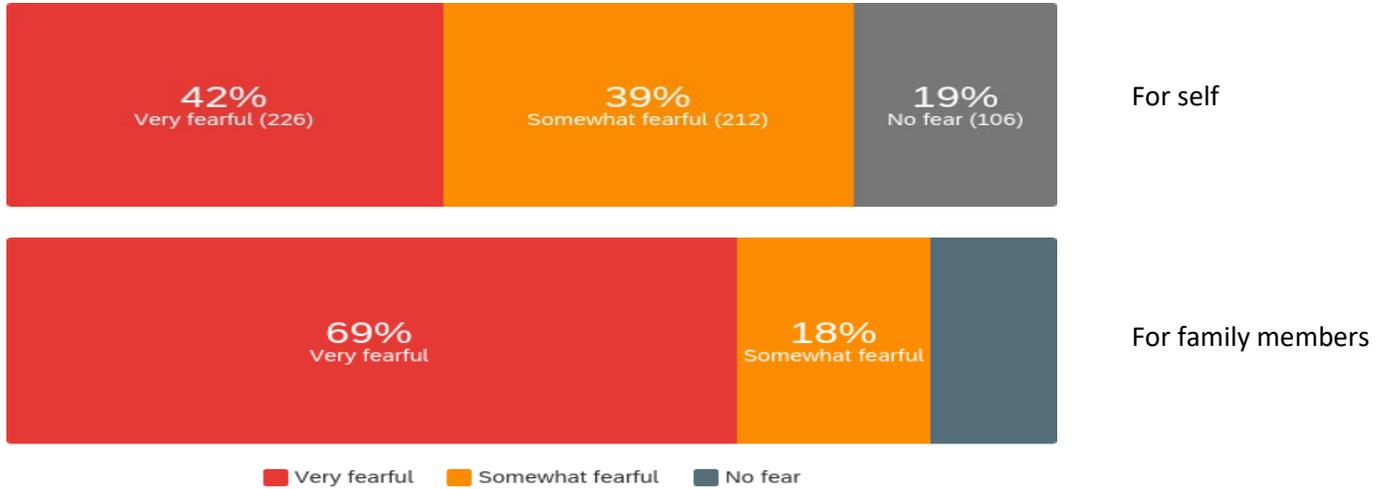

printing and scanning but i just bought a printer with a scanner (1)

Loss of family members and immigration status (1)

Please indicate your level of agreement for the following statements about your perception of Compton College's ability to bring students back to campus and your attitudes about safely returning to campus.
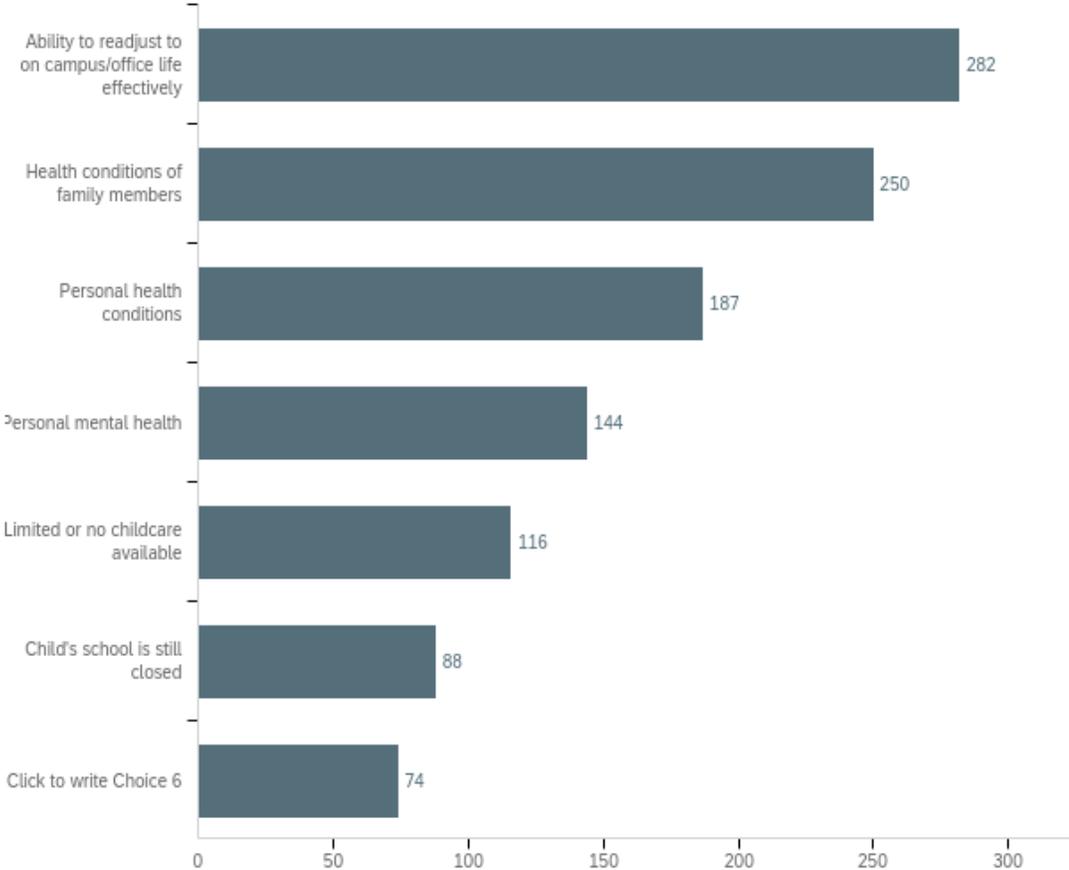

Statement	Strong Agree	Agree	Disagree	Strongly Disagree	Not applicable
I feel confident that Compton College can bring students back to campus safely.	24%	39%	24%	10%	3%
I believe appropriate safety protocols will be in place when students return to campus.	27%	45%	20%	4%	3%
I understand protocols being implemented to prevent COVID-19 infections on campus.	33%	46%	14%	4%	4%
I have no fear of being infected with COVID-19 while on campus.	18%	20%	36%	24%	3%
I feel safe from COVID-19 while commuting to and from campus.	20%	30%	31%	14%	5%

Legend:
- Strong Agree
- Agree
- Disagree

Face shields	40.16%	206	36.06%	185	23.78%	122	513
Optional face coverings	31.19%	155	56.34%	280	12.47%	62	497

What concerns do you have about returning to campus? Check all that apply.

Concern	Count
Ability to readjust to on campus/office life effectively	282
Health conditions of family members	250
Personal health conditions	187
Personal mental health	144
Limited or no childcare available	116
Child's school is still closed	88
Click to write Choice 6	74

What other concerns do you have about returning to work on campus?

Desire of safety protocols (e.g., Cleanliness, resources, adequate classroom space) and the concern that it will be difficult to enforce/satisfy, "I'm concerned that restrooms and classrooms won't be sanitized properly. I've been a student at Compton College and attended the campus and at times the restrooms looked and smelled like they hadn't been properly cleaning in days. I also worry that students will not want to follow safety procedures. As well as the school not having enough supplies so that all students don't have to share items and what not," while another student said, "People not feeling well and still coming to class, people being malicious and spitting on elevator you don't know about it you touch it now you are taking the virus home to your family…,""Most classes before COVID were very full to the point where some students didn't have a seat. I am concerned about being about to actually social distance. In theory it seems good, but in reality, especially with the overpopulated science classes social distancing just seems impossible." (43)

Risk of catching COVID, other variations of COVID, "Don't feel safe returning back to campus, especially in a classroom with other students. I feel 100% safer at home, don't have to worry about students coughing and sneezing and contracting the covid- 19 virus and bringing it home to my young children." (34)

No concerns about returning to school/None (30)

Fear of bringing COVID home, "Bringing the virus home to my children," "Getting covid and bringing it home to my grandmother she's all I have" (15)

Needing flexibility with work and family or just appreciating the flexibility of remote learning, "Some of my fears are I will have to spend more money on gas. My child is able to stay home with me while I attend my classes online. I don't want my child in childcare. And I don't want to bring anything home to my child." (10)

Don't want to be forced or uncomfortable following safety protocols or to be vaccinated, "Being uncomfortable wearing a mask for a long time in a 5 hour classroom setting with 36 students," "The only concern I have he being forced to get vaccinated" (8)

Other concerns (e.g., getting transcripts, parking, availability of classes, school shootings, fear of being behind academically) (4)

Money, work, cost of being on campus, "Do to covid19 i have not been able to find work at this time and would need money to travel to campus and from campus." (2)
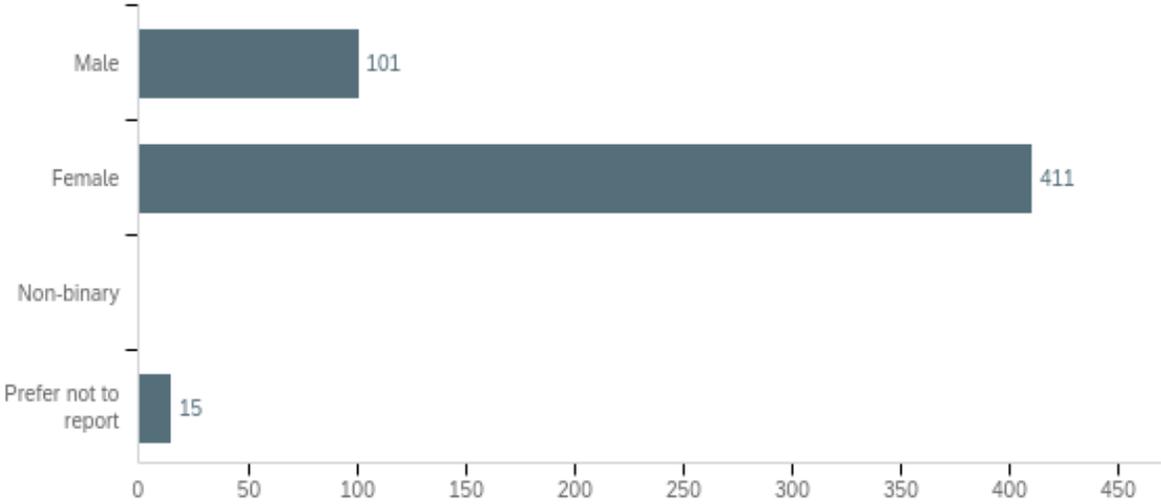

Hard time adjusting to classes and work schedule, "I WOULD LIKE THE COLLEGE TO OFFER ONLINE CLASSES FOR FALL SEMESTER FOR WORKING PARENTS AND WITH CHILDCARE ISSUES.I have been doing very well with my online classes and would love to continue online for fall 2021," or "the smooth transition from online to in campus teaching. This entire Nursing path has been poor due to disappointing communication from faculty and students. The management of this communication is often done "last minute" with a "take it or leave it" ideology." (2)

Air ventilation, "That it won't be safe enough and with the possibility of getting the COVID-19 since we're going to be in a classroom with no free air from the outside ventilation that's my concern." (1)

What is your ethnicity/race?

Answer	%	Count

Do you have any final comments about the return to campus?

Ease of studying at home online or flexibility of in-person and online learning, "I don't want to return to campus. Dealing with parking issues, being at school late at night. Being in lecture for 4+ hours in an uncomfortable chair. I like online school it's easier by being home and don't have to drive to campus for class I can spend more time with my family. Being able to get grades ASAP is also a plus with online classes. Add more online option classes with zero campus" (33)

Concern about people adhering to safety protocols, "A concern I have is peers not following social distancing or keeping their masks on while on campus. If a student is covid positive while attending, how will they quarantine and continue with their studies if class is on campus. I am also concerned about the possibility of an outbreak. This will be adding stress during our studies especially during this fall with the flu season and covid-19." (23)

Opening to early, "I feel that the campus should remain closed for the 2021 semester and work on reopening for spring 2022 while people are still getting vaccinated, and wait for number cases reported to further go down," "Fall is coming that is when people start getting sick from the flu etc. Scared that another wave of a new variant might come and spread around the campus. I live with my parents and my mom has asthma, diabetic. I'm scared to bring any virus home. I just feel like its too soon the pandemic is still happening." (16)

"Excited to return!", "Hurry up and open already," "I already took my vaccines so I feel confident…" (16)

Required vaccine or fear because others refuse the vaccine, "I believe that in order to return to campus, students and teachers should need to have the covid vaccine." (8)

Desire for in-person lab classes or people who just learn better in person, "I think it is crucial that certain majors are able to go to campus. Skill based majors are at a learning deficit because of campus closure and inability to practice skills consistently." (5)

People should not be forced to come back to campus or to get vaccinated (5)

Afraid of family getting sick (3)

Want access to campus resources, "I am looking forward of returning back to campus and have library access to study." (2)

Want smaller class size (1)

Need to be in-person for better availability, "many times I do not get emails answered worse will be in person do to the wait time or non-availability" (1)

Appendix

Uncoded open-ended responses

Other responses from Which of the following challenges or issues have you faced at any time while completing your coursework since March 2020 due to COVID-19?

A concern I have is peers not following social distancing or keeping their masks on while on campus. If a student is covid positive while attending, how will they quarantine and continue with their studies if class is on campus. I am also concerned about the possibility of an outbreak. This will be adding stress during our studies especially during this fall with the flu season and covid-19.
As long as safety measures are into play it should be alright
College is for grownup people so I believe that everyone has to know what to do in order to be safe.
Excited to return!
Fall is coming that is when people start getting sick from the flu etc. Scared that another wave of a new variant might come and spread around the campus. I live with my parents and my mom has asthma, diabetic. I'm scared to bring any virus home. I just feel like its too soon the pandemic is still happening.
Feel isn't safe is better online
Feel unsafe returning to campus because I do not know where people be at 24 hours of the day don't have an idea if they have coronavirus feel saver online because do not have contact with people
Half campus and half online. Please donâ t allow everyone to come back and risk their lives. Appointments need to be made prior to coming on campus and all and another thing when I contracted COVID my head temperature was a 98.4 NORMAL that sickness will have you functioning normal until it strike with the vengeance. I had a normal head temp the entire process through while everything else was being attacked their is no such thing as safe protocols because I did that and battled with that sickness for a month and a half and so did my relatives. Please donâ t allow everyone to return back to the campus like only 10 people per class and day by day appointments made online before they come in person to see counselors etc.
Hopefully restrooms aren't closed
How will my schedule work if i have 5 other classes in my high school right after this college course
Hurry up and open already.
I feel that it is easier for students to stay online. It is easier to complete classes quicker than being on campus worrying about COVID -19.
I already took my vaccines so I feel confident even before it about covib so no, itâ s all good.
I also fear that the professor will not be masked and able to spread infection. On the other hand, if they are masked-would I be able to understand their lecture.
I am looking forward of returning back to campus and have library access to study.
I am sure that when we return to campus all the proper safety protocols will be enforced and followed by every one on campus . So that we can start to get back to some kind of normal. Thank you
I appreciate the effort, but if you do have the option of returning to campus I think you should keep the option for people to continue to zoom or participate online and not making in person learning required
I believe that in order to return to campus, students and teachers should need to have the covid vaccine.
I believe there should be virtual and some in person teaching such as for example, remote lecture and in person labs for nursing students to minimize every day and every student exposure.
I canâ t wait until we are all able to return to school.
I do not entirely agree but I do believe that it should be a decision of each student and not an obligation since he has taken the online courses for a year. but if that is the case, the students should choose.
I do not feel safe covid iss real
I do not feel safe. Being that no one truly practices social distancing. I just want to attend class and not have all

the extra protocols. Which I am able to accomplish from the comfort of my home. Safely.
I don't think it's a good idea and I'm fearful of getting sick because I have high risk family members at home.
I dont think I am ready to return.
I don't want to return to campus. Dealing with parking issues, being at school late at night. Being in lecture for 4+ hours in an uncomfortable chair. I like online school it's easier by being home and don't have to drive to campus for class I can spend more time with my family. Being able to get grades ASAP is also a plus with online classes. Add more online option classes with zero campus
I feel comfortable with lectures being virtually online. Clinical hours and skills being at facilities and on campus for nursing students.
I feel it's to soon to return to campus Corinna virus is still have in impact on its society. Until everyone is vaccinated the school should be able to open
I feel like this should be optional and not mandatory
I feel that it will not be safe to complete return to campus until Spring 2022
I feel that the campus should remain closed for the 2021 semester and work on reopening for spring 2022 while people are still getting vaccinated, and wait for number cases reported to further go down.
I feel we should wait a little maybe until next spring semester I don't feel I'm prepared to go back and I'm waiting a least the rest of 21' until I decide I'm prepared to take the vaccine and I know other students have the same thought
I have no concerns regarding this besides knowing if K-12 students will be returning. I myself and my family has gotten sick with Covid-19 last summer so we have/our bodies have already created antibodies for it and I feel completely safe returning back to our lives. I also feel that anyone that has gotten sick should feel the same and/or that has gotten the vaccine. No one should be forced to do these things, and if anyone feels unsafe they can work from home or learn from home until they feel safe to return. It is extremely hard to be at home while learning virtually because for us parents we also have to make sure our kids are in class and help them with their classwork.
I hope it can be done in a way where it is safe also the idea of being able to physically go to campus is a good idea I just hope it can be done in a way where there is no fear or where we are so focused on keeping people safe that education suffers as a result.
I hope safety regulations are seriously implemented.
I hope the community where the college located is accepting of being vaccinated to prevent and slow te spread of Covid-19.
I hope to continue nursing program at home through zoom.
I just prefer online classes to be honest
I just want to stay home and do my class online I do not want to go back to the campus just stay home and stay safe.
I like the online schooling better but in a way I do think it is important for students to meet face to face with their instructors.
I miss my school so much, but there are people that don't like to follow safety regulations and that's what scares me.
I only have concerns from fellow peers and staff about enforcement of unconstitutional items such as wearing a mask. If they do not have a proper medical license, they should not be mandating or enforcing anything due to liabilities, also disclosures of disabilities and or impairments are private information and do not need to be disclosed due to ADA and HIPAA.
I personally feel like in person classes shouldn't start until spring of 2022
I personally wish to continue my schoolwork and school life from my home. I believe that the return to in-person classes will be detrimental to the work that students produce just like how detrimental it was at first when we needed to get used to online classes. I enjoy having asynchronous classes because it gives me a freedom that I never had with school and it allows me to look for work and when I do find a job asynchronous classes would be the key to allow me to work and do school at the same time.

I prefer not going to Campus and waiting another semester to see how things go.
I prefer online classes
I rather do online class Iâ m safe at home n itâ s flexible with my work schedule
I rather stay online to finish up my classes needed to get into the Nursing Program. do to safety
I strongly believe that half of the classes should continue being online UNLESS they require any sort of lab to be completed with the course (ex: bio, chem, micro, anatomy/physio, nursing skills lab, etc). I do not believe it is necessary to come back to campus so soon for a short lecture class (less than 2 hours). The number of students in the classroom should be capped to around 15 students especially if they will be together for a longer period of time, regardless if they're vaccinated or not. I would still feel uncomfortable being without masks along with other students who are vaccinated like myself. Making the vaccine mandatory for staff and students is also a violation of their rights. I understand we need to be moving forward, but people who are not vaccinated should be equally as respected as those who aren't, especially if they have any sort of allergy that is not allowing them to even receive it.
I suggest no earlier than Spring 2021 so that more students gain access to vaccinations and the daily adjusted case rate in LA county decreases further.
I think it is crucial that certain majors are able to go to campus. Skill based majors are at a learning deficit because of campus closure and inability to practice skills consistently.
I think vaccination must be required in order to return to the campus setting. 75% of classes can now be ONLINE ONLY. Come to campus ONLY for LABS! ALL LABS, FROM MICROBIOLOGY (SCIENCE) TO WRITING LABS.
I think we are rushing into this, we should wait til the virus becomes less relevant and the situation is under full control
I think we should continue on-line classes another for fall 2021!
I think zoom class is safer and more convenient for people with children and work full time.
I want to limit my time around others as much as possible since contracting COVID almost dying while hospitalized
I will not take classes on campus this fall semester, I will wait until spring 2022 to take classes on campus. I do not feel safe this year going on campus. Year 2022 more people will have gotten the vaccine and my sons daycare center should be open again. I LOVE COMPTON COLLEGE AND WILL CONTINUE TO DO ONLINE CLASSES UNTIL SPRING 2022. THANK YOU FOR THIS SURVEY!
I will only take online classes from now on. Fall 2020 was my first time taking online classes and I found it more convenient. I was able to manage my time as a mom, employee, and student.
I wish to remain off campus and continue all classes online
I work in the medical field and I am around sick people 7 days out of the week. If I have the option of not being present in class I will choose virtual online classes, since I work only a daily basis and I did contract Covid and almost died. I would not which this on anyone
I worry about the sanitation. Will compton be able to keep up the effectiveness of sanitation in order to ensure that the campus is always sanitized
I would feel safer to return to campus no sooner than spring 2022
I would like our campus to provide a safe and clean environment. I understand that it will be the responsibility of all of us on and off campus.
I would like to keep taking classes online until 2022 when we know that we are safe rather than having to worry about the health of myself and my loved ones.
I would love to come back to campus
I would not feel safe if i had to return to campus at this time.
I would rather stay online until the cases are fully resolved
I would say, encourage those in the chat room to treat students equal. Don't give 110% to help one student, and halfhearted help the other.   Taqwa

I wouldn't want to return on campus because I'm afraid of my children getting sick.
I'll be looking forward to in class sessions again.
I've had a hard time learning through zoom. I am more of hands on learning and in person participating type of student. I'm hoping something can be worked out for those students that are more of kinethestic l learners
If its going to be the fall season thats the highest risk since its going to be the flu season. It wouldnt be right to go back to school next fall.
If many times I do not get emails answered worse will be in person do to the wait time or non-avaiability
Is it mandatory
It is too soon to return to campus, don't feel safe, don't feel ready. Prefer to continue learning online via remote canvas
It would be ok, but I am still unsure of returning since it can be risky for my self and my health and my family memebers.
Itâ￼￼s not safe as a lot of people are refusing the vaccine.
Iâ￼￼m ready to get back to campus and feel like it could help myself and others with our mental states.
Iâ￼￼m scared to go back to campus, I donâ￼￼t think that these student will take this seriously. And adhere to all of there pro cautions set forth by the school.
LET US RETURN AS SOON AS POSSIBLE. IM TIRED OF ONLINE SCHOOLING!
Making sure we stay safe without getting the virus and making sure that everyone keep their hands clean

Not a lot of students will follow the protocol and being in person is to be on hands in medical classes or

engineering classes. And we all still run a risk
Not at the moment
Not at this moment.
Not ready to return. Hopeful that everything will be ok by 2022, but not this year since people are not being careful.
Not safe
Open the campus!
Please allow more zoom classes or add more online classes
Please check that your professors ideas for returning to campus are based in reality not the ideal
Please continue to have online options for all classes.
Please everyone get vaccinated so we can go back to normal
Please open the campus
Please return to in person as soon as possible. My learning for my career depends on Hands-On learning which I am not able to receive virtually. Thank you!
Ready to come back
Security is so unprofessional and to top it off the daily list is not updated accordingly.
Too soon
We all know even though all measures could be taken it is not guaranteed for students to not contract the Covid-19 virus. Lastly, I recommend the campus to go green. Buy solar panels and other stuff to make your cost for the school to go down significantly. So maintaining the school won't cost as much. Also this pandemic showed us it isn't necessary to go to work or school physically it is not essential because we have Technology to help us from that. Also people are saving money, time and resources from not physically being on campus or work.
We all know the pandemic has affected everyone, how can some of return when some of us lost someone special we are afraid to go through another heartbroken moment.
We don't like being called Latinx. Comes off as cultural imperialism
We should not be returning to on-campus classes this year (2021). Fall 2021 is flu season and it will cause another unnecessary mental stress/worry to add to the Covid-19 pandemic.
What are the rules we have if we are in sports?
Would prefer to be able to stay virtual if I do choose, living in a multi generational home, itâ@@s imperative that I stay safe to keep everyone else safe
Yea wtf is latinx
Yes, do NOT make mandatory vaccination like CSUDH did to be on campus. If that will happen then that will have less people come into the campus because of personal reasons including myself.
Yes, if we do return for fall they should hold accountability for everyone's financial situation and schedules for classes for a successful transition. Since for many, it has been more flexible taking courses online.
i am very hopeful and excited to return to campus
i don't think we should return soon to campus it is too early for it. but if schools re open back up to walk in i believe there should still and always have the option to do online because majority of the people have jobs, kids and or take care of others.
no

optional remote class time is a wonderful ideal for those whom are not available to attend class. This should be an ongoing option. more students may attend.

please let us go back
scared to catch covid-19 and scared to get the covid-19 test and covid-19 shot
to have safe environment to going back to Compton College

What other concerns do you have about returning to campus?

none
I have no other concerns about returning to campus.
Getting sick, I donât believe itâs safe
That there will not be many safety precaution taken at the school. that there wont be hand sanitizer at each building door classroom door, bathroom door or wipes.
none
no concerns at the moment
I want to return to my class and also be safe and stay six feet away from people.
n/a
N/A
Contracting the virus
Do to covid19 i have not been able to find work at this time and would need money to travel to campus and from campus.
People not following safety protocols
I WOULD LIKE THE COLLEGE TO OFFER ONLINE CLASSES FOR FALL SEMESTER FOR WORKING PARENTS AND WITH CHILDCARE ISSUES.I have been doing very well with my online classes and would love to continue online for fall 2021.
Iâm mostly just scared about bringing it back to my family. I live with my grandfather who is highly at risk so I would NEVER want to be put in that position.
staying on top of keeping the campus clean and especially the restrooms. Which suffered pre covid.
People coming to school sick and passing the virus around.
I feel that not having control of requiring people to get vaccinated still puts my high risk family members at risk. IE my 18 month old son.
Not many, students should just recognize we need to focus on keeping each other safe.
Unclean campus and no way to enforce social distancing
Most classes before COVID were very full to the point where some students didn't have a seat. I am concerned about being about to actually social distance. In theory it seems good, but in reality, especially with the overpopulated science classes social distancing just seems impossible.
None
None.
Too many gatherings
I'm concerned that restrooms and classrooms won't be sanitized properly. I've been a student at Compton College and attended the campus and at times the restrooms looked and smelled like they hadn't been properly cleaning in days. I also worry that students will not want to follow safety procedures. As well as the school not having enough supplies so that all students don't have to share items and what not.
Getting covid and bringing it home to my grandmother she's all I have
personal safety from school shootings
Increased risk of catching covid
I don't want online options to disappear. It was convenient having science classes at home.

health wise-catching Covid
Covid 19 has forever changed our lifestyle and I do not know if I can ever truly feel safe again.
Some not following rules or things that require taking off mask
Whether parking has improved
Fall is flu season and its very unsafe to go back to school.
the fact that students are bound to be behind because we are swapping back to more consistent education and professors are bound to not care.
None
My biggest concern is if all the student's were to return back to college. For people that have struggle with getting their old transcript's how would that work no? People struggling to take care of their kids? People that takes care of their family members that are sick how can we go back to college when no one has nobody to take care of their family members? Everyone is looking for a job to feed their family this pandemic has affected everyone.
I don't feel ready yet to return to campus. Even if safety measures are applied, I still don't feel safe.
That there's people still not wanting to wear masks, be vaccinated or no falling safety precautions to the tee.
If its going to be the fall season thats the highest risk since its going to be the flu season. It wouldnt be right to go back to school next fall.
Cleanliness, resources, adequate classroom space, Instructors willingness, safety, Flexibility I want the option to have remote learning as well...
Other students and admin not following covid-19 safety precautions, such as social distancing and wearing face masks properly.
none
Only concern I have about returning to class is getting infected with COVID and bringing it home to my son. Also, my brother who just underwent an open heart surgery and can cause death if infected with COVID
No concerns about returning to school.
We need to be safe to going back to the Compton College.
Catching covid, how safe it will be
People will not follow the standards set by the school therefore making it unsafe for the rest of us.
Students/staff will be careless and will not follow correct protocols. Not enough supervision or implementation of sanitation/social distancing/face coverings
The concern is if, the campus are requiring students to be vaccinated then I will not be in campus to avoid vaccination. I might not even have online classes since the professors require more than they should so I will just do other things that is not school related until the requirement of being vaccinated is gone.
Most of my fellow students don't trust the government. Therefore they are not getting vaccinated!
being around too many people, other people not being safe. don't want put myself in unnecessary circumstance, people might have covid. feel safer taking course via online at home
None
Not being allowed to return without the vaccination.
None.
In the lane where cars drive, I was told to walk with my bike. Sometime there are no cars. I understand not riding bikes on sidewalks, but it unreasonable to make it illegal to ride my bike on the car and bike pathway. Taqwa
Being away from my baby too long.
I just want to follow a safe protocol that will allow students and faculty to be able to share a safe environment

Students gathering and the cafeteria to get food
my concern is that some people will be careless with wearing their mask, not washing their hands, become to confident if vaccinated believing that they cannot get the virus or spread, misunderstaning. Not being considerate others by NOT following protocols
The number of people getting covid increasing.
My concern is that even though I have been vaccinated I can still get the virus. I have small children and family members with health conditions and I think about their safety.
None
Being uncomfortable wearing a mask for a long time in a 5 hour classroom setting with 36 students
The amount of people in a closed space
rather stay virtual until the covid-19 is cleared out and leaves
The cleanliness of others
I am concerned about how safely we return if we do. I am also afraid for my family members. We all want secure and healthy living. As far as expenses, it will be difficult going back to campus without paying for high gas prices and also adjusting economically to eat on campus because it can be costly as far as also having to pay for protection.
Nothing else
Nothing additional, only what was already selected.
How many students will be in each class since we are doing the 6 feet apart?
Social distancing
not getting the vaccine and dont want to get infected by others. also i am unemployed because of the pandemic looking for full time work.
I have been actually waiting for the government because Iâm an immigrant/Hispanic, and I have been applying to get a visa and maybe a green card, and had my court already and it went really well, so I have been waiting to see it I could get it so I can study for administration of justice, get a degree and then join an academy, to become a police officer or FBI agent, so it all kinda depends on it for me, for now. Iâm just working saving up money as living life.
It is not a good idea to open the campus back up. I am barely recovering over COVID, and I did everything right wore my mask, stayed in the house, worked and went to school from home, disinfected etc. You can be as safe as you want to be and still contract it everyone I knew ended up contracting it and put on oxygen tanks so for someone who dealt with COVID in a personal way. No thanks just please allow classes to be half and half some on campus but still majority online. This sickness is still out there and I refuse to get a vaccine where the germ is being placed back inside of me to allegedly immune me from it. Thatâs lies from the pit of hell. Please be open minded. This is not a good idea
Usually in school student still are in close contact and some students will disapprove of mask or gloves not everyone will follow directions
Not everyone will adhere to rules and regulations
none
None, just need to return as soon as possible to in person learning as my course is all hands on and the only real way to learn. Thank you!
My children
Breathing in masks for hours on end.
Students not taking safety protocols seriously.
My only concern is having mandatory face mask. I have a hard time breathing properly with them and get a stuffy nose and I can't imagine the professors having to wear them while lecturing for hours.
People not feeling well and still coming to class, people being malicious and spitting on elevator you donât know about it you touch it now you are taking the virus home to your family. People is dying because of this virus, this is not a situation to play with.

Some of my fears are I will have to spend more money on gas. My child is able to stay home with me while I attend my classes online. I donât want my child in childcare. And I donât want to bring anything home to my child.
The school not keeping up with sanitation
What will happen to students who dont comply with wearing face masks Correctly. Ive seen it alot where people don't take it serious and their mouth and nose isn't fully covered. I have older parents I live with and one of them has Cancer I fear bring the virus home to them.
Starting back school then catching covid
None
Online learning was complex at times, but it enables me to focus better rather than being anxious on campus.
Don't feel safe returning back to campus, especially in a classroom with other students. I feel 100% safer at home, don't have to worry about students coughing and sneezing and contracting the covid- 19 virus and bringing it home to my young children.
The consideration of others. Common courtesy is not so common now and days.
my safety and my family getting exposed
The only concern I have he being forced to get vaccinated
That students and staff be honest if they've been exposed
Getting Covid
None
No other concerns but knowing what precautions are gonna be taken in place to come back to campus.
with my health I do not want to come on campus I am around children I do not want to take the risk of effecting them
None at this time.
none
Too soon to return to campus. Too many students in nursing program. I feel it will not be organized and Covid-19 precautions will not be maintained at all times. Fear that Covid-19 vaccination will be required to attend on-campus classes.
Bringing the virus home to my children
No
I would just want to be safe
Students and professors not following safety guidelines.
People having the COVID-19 and do not say anything due to having to attend class
I strongly disagree because everyone is still at risk at getting COVID. I already had COVID and it was not great. I still think eventhough I had it and have been vaccinated I can still get it.
Just really going back and being around others not knowing if they care for others health and don't show up sick.
I just want safety protocol measures in school when the campus opens, so that we can feel safe and return to campus.
None. I am fully vaccinated. The ability to make friends regarding all people is something that should be addressed.
Personally, for me it would be contracting COVID-19. Due to the safety of my own health and my family members. I also donât feel very confident about the vaccines that are out now in the market so another concern of mine would be it being a requirement to return. As of right now, the best choice would be online only (for me), further down the road I believe if cases drop and better studies are proven for those who have gotten the vaccine Iâll feel comfortable with returning to campus.
Not planning getting vaccine
The smooth transition from online to in campus teaching. This entire Nursing path has been poor due to disappointing communication from faculty and students. The management of this communication is often

done âlast minuteâ with a âtake it or leave itâ ideology.
Vaccine being a mandatory requirement for all.
Getting infect also I do not plan getting vacinne my concerns is the school might make it required also do not know where people be at 24 hrs of the day feel safer at home taking classes online with no fear
Face coverings: which are not laws and is a medical devices being enforced by individuals with no Medical/Doctoral Licenses which is technically illegal and they can be liable in the court of law. Very unconstitutional. Vaccines: not FDA approved and it's only EUA which doesn't mean it's approved, it's like clinical trials. Cannot be forced or mandated as it's unconstitutional. Covid Tests: Are not laws and cannot be mandated unconstitutional.   If people are scared and fearful they should stay home.
N/A
People being weird about COVID
Hard time adjusting to classes and work schedule.
Noun
I just donât want to bring the virus to my children
Just general safety.
Others not following safety measures.
Nothing else.
People not following the rules and protocols set in place and not taking it seriously resulting in further spread of Covid.
Will there be more classes available
People not following guidelines
No concerns at all.
Other variations of covid
get covid, and take it home or the virus gets worse.
Limited class sizes
Whether we will need to have continual covid testing. Getting the tests is not only uncomfortable and intrusive, but is time consuming and expensive.
I just want everyone to be safe and protected.
I do not feel that it is safe to return to campus with COVID still being an issue. As a student I live with elder family members and it is not fair to them to be put at risk if I have to be on campus for school rather than staying safe online. Just because precautions are being lifted, the school environment is still something that cannot be guaranteed. We do not know other students and their lifestyles to be surrounded by others that you have no control over their lifestyle choices and how they take precautions or not. I feel as though it is not fair to be put back into on campus learning with cover still being an issue. It should not return until covid is completely over.
My concern for me and the school is that. If I contract the virus because I came back to campus then I will sue the school.
That it wonât be safe enough and with the possibility of getting the COVID-19 since weâre going to be in a classroom with no free air from the outside ventilation thatâs my concern.
Too much fear and concern about getting COVID-19 to focus on lectures and assignments. Especially when professors require group activities.
It is difficult to transition to both work and school at the same time.
