**El Camino College
Transfer Rate by Years to Transfer
Twelve-Year Trends**

From the California Community Colleges Chancellor's Office Data Mart:

Note: The Transfer Velocity Cohort is created by evaluating all first time freshmen six years after their entry. Those students who have completed twelve credit units and attempted a transfer level math or English course are included in the Transfer Velocity Cohort. Transfer rates for years three, four, and five are retrospective and cannot be reported until the cohort is finalized at the completion of the sixth year after initial enrollment. Students with multiple college enrollments are reported as members of the Transfer Velocity Cohort for each college attended.
