Age by Ethnicity

The table below presents point measures of age for each ethnic group¹. Overall, ECC students have an average student age of 25, a median age of 22 and a mode of 19. The mean age tends to be considerably higher than the median due to a larger population of older-aged students. The mode ranges between 19 and 22, depending on the ethnic group.

In general, the Asian, African-American, White and American Indian/Alaskan Native student tends to be older, while Latinos, Pacific Islanders and students who indicated two or more races are relatively younger than the ECC student population as a whole.

Age Distribution by Ethnicity (following page)

As suggested above, most ethnic groups at El Camino College represent varying percentages of the student body relative to age or age group. White students are more likely to be older while Latino students are more likely of traditional college ages and in their 20's and 30's. Less-pronounced variability is found among other ethnic groups.

The chart on the following page represents the *percentage* of students from each ethnicity within each age or age group. Smaller groups (American Indian/Alaskan Native) and unidentifiable groups (two or more races and unknown) were excluded from the chart but are found in the statistics table above.

¹ Definitions of descriptive statistics used to measure age: **mean** age is the average age, or the single age that best describes the ECC student body; **median** age is the age at which 50% of the ECC population lies above and below; and **mode** age is the single most common age.
