

# El Camino College

## Degrees and Certificates Awarded

### Recent Trends

---

This report examines a five-year trend in degrees and certificates awarded at El Camino College and El Camino College Compton Center.

**TABLE 1. Degrees and Certificates Awarded (Five Years)**

Campus	Award Type	2006-07	2007-08	2008-09	2009-10	2010-11	1-yr change (%)
Main/Torrance	Degrees	1,106	1,133	1,140	1,304	1,399	7%
	Certificates	347	370	445	403	414	3%
Compton Center	Degrees	124	106	150	157	211	34%
	Certificates	16	29	27	78	51	-35%

\*Awards reported as of MIS Data Submission in Summer/Fall. Actual campus figures may be slightly higher.

## DEGREES

At ECC, students were awarded in 52 different majors in nine different divisions. At the Compton Center, 21 different majors within six divisions awarded degrees. Since 2006-07, ECC and the Compton Center have awarded an increasing number of degrees to students (Table 1). From 2009-10 to 2010-11, degree counts at ECC and the Compton Center increased by 7% and 34%, respectively. Trends in award counts may be attributed to recent enrollment trends. Taking into account that the average time to completion is four years, award counts increased during the last five years as enrollment counts decreased between 2002-03 and 2006-07. A possible explanation may be that with fewer students enrolled, classes are less impacted and more students are consequently able to earn their degree/certificate in a timely manner.<sup>1</sup> Another contributing factor may be the concurrent efforts by counselors as well as various programs aimed at increasing graduation rates.

In 2010-11, the increase in one particular major was evident at both ECC and the Compton Center. A rising number of students were awarded degrees in General, Transfer or Liberal Studies, producing a one-year growth of 15% and 53% at ECC and the Compton Center, respectively (Tables 9 and 11). Beginning in 2008-09, however, Transfer Studies was no longer offered to students. Despite the inactivation of this program, students continued to obtain degrees in General and Liberal Studies at an increasing rate.

---

<sup>1</sup> The Office of Institutional Research plans to research this theory in a future study.

One program that experienced a noticeable decrease in degree counts at both El Camino College locations was Nursing. Several years ago, the Nursing program supported two additional sites, but the department was no longer able to maintain these sites. The program was consequently reduced to offer only two different types of programs (generic and LVN-to-RN) at ECC and the Compton Center. As a result, the number of degree counts reduced by 45% and 36% respectively from the previous year (Tables 9 and 11).

## Main Campus Degrees

At ECC, the counts of degrees awarded have consistently increased throughout the years, peaking at 1,399 in 2010-11 (Chart 1). An outline of degrees awarded by type (Table 2) reveals an increasing number of students obtaining an A.A. versus an A.S. degree. Counts for A.S. degrees have remained consistent. The 5-year trend for A.A. and A.S. counts indicate a 55% and -6% growth, respectively. All divisions experienced a growth in degrees awarded last year, with the exception of Health Sciences and Athletics (Table 9). Compared to other majors, mathematics and pre-dentistry/pre-medicine grew considerably, with degree counts double or triple the previous year's counts. The programs' success may be a result of numerous factors, such as the efforts of the faculty, counselors, and project directors. Overall, degree growth appears to be outpacing enrollment growth. Degree counts increased by 27% during the 5-year period, while enrollments between 2003 and 2007 declined by 6% (not presented in Table 1).

**TABLE 2. El Camino College (Main Torrance Campus) Degree Awards by Type**

Degree Type	2006-07	2007-08	2008-09	2009-10	2010-11
Associate of Arts (A.A.)	582	595	643	797	903
Associate of Science (A.S.)	524	538	497	507	496
Total Associate Degrees	1,106	1,133	1,140	1,304	1,399

## Compton Center Degrees

Following a brief decline in 2007-08, the count of degrees awarded to Compton Center students have steadily increased in recent years. Similar to the trend seen at the Main Torrance Campus, A.A. counts have increased at a higher rate than A.S. counts over the last five years (Table 3). From 2006-07 to 2010-11, the count of A.A. and A.S recipients grew by 78% and 51%, respectively. Degree counts increased dramatically between 2009-10 and 2010-11, resulting in the highest count since 2006-07 (Chart 3). The Business division experienced the most growth. Business Management degree counts in particular nearly tripled in 2010-11 (Table 11). One contributing factor may be the efforts of counselors, who provided students with an outline of Business classes to be offered in the future (Business Matrix). Overall, degrees awarded increased during the 5-year period by 70%.

**TABLE 3. ECC Compton Center Degree Awards by Type**

Degree Type	2006-07	2007-08	2008-09	2009-10	2010-11
Associate of Arts (A.A.)	89	66	102	99	158
Associate of Science (A.S.)	35	40	48	58	53
Total Associate Degrees	124	106	150	157	211

## **CERTIFICATES**

There were a variety of changes made to community college certificates beginning in 2008-09 due to changes in Title 5 regulations. For ECC, regulation changes involved renaming certificates from *competence* and *completion*<sup>2</sup> to *achievement* and *accomplishment*. Generally, certificates of achievement are those of 18 units or more, appear on a student's transcript and are approved by the Chancellor's Office. In addition, the new regulations provided for the creation of lower-unit (12-17.5) certificates of achievement with approval of the Chancellor's Office. Certificates of Accomplishment are those that are less than 18 units, not Chancellor's Office approved and will not appear on a student's transcript.

One major impact of the new certificate scheme is that students are permitted to receive multiple certificates in one program with different areas of emphasis. With some programs electing this option, the number of certificates offered at ECC grew from 78 to 95 in 2008-09. In the last 3 years, however, 11 programs have been inactivated. A grade point average (GPA) of 2.0 is required for all certificates, with Honors and High Honors certificates of achievement awarded for minimum GPAs of 3.0 and 3.5, respectively. For the purposes of this report, all certificates are treated equally.

### **Main Campus Certificates**

As depicted in Chart 2, the number of certificates awarded has steadily increased since 2006-07, peaking in 2008-09 and plateauing thereafter. The Division of Behavioral and Social Sciences experienced the most growth in 2010-11, with Childhood Education awarding the most certificates compared to all other majors (Table 10). Childhood Education's previous increase in 2009-10 was likely due to the implementation of a certificate awareness campaign, which encouraged Childhood Education students to complete the program and file for a certificate. Though the initiative did not continue, efforts by the department did not abate. Higher than average awards in 2010-11 may be showing the effects of these continued efforts. Overall, the number of certificates awarded between 2006-07 and 2010-11 has increased by 22%.

---

<sup>2</sup> *Competence* and *completion* are now reserved for special noncredit certificates (not awarded at ECC).

## Compton Center Certificates

Following the 5-year period's peak in 2009-10, certificates awarded at Compton Center decreased by 35% in 2010-11 (Table 12). This decrease may be attributed to the reduction in certificate programs offered, particularly in Child Development. Despite this recent program contraction, certificates overall have increased by more than twofold since 2006-07. Of the divisions, Industry and Technology grew the most, with Air Conditioning and Refrigeration being the most awarded certificate in this division.

## INITIATIVES

There are several initiatives currently active at ECC that focus on students' success in specific majors. These initiatives include Career and Technical Education (CTE); Science, Technology, Engineering and Mathematics (STEM); and Science, Engineering and Mathematics (SEM). CTE programs are technical or career oriented in nature, ranging from Administration of Justice to Welding. Some CTE programs, mostly in the technical area, are also part of the STEM initiative. STEM includes three divisions— Industry and Technology, Mathematical Sciences, and Natural Sciences. SEM includes only Mathematical and Natural Sciences. The primary difference between STEM and SEM is the latter's focus on transfer programs as opposed to technical ones that include options for certificates. With the exception of two majors (Computer Science and Environmental Horticulture), SEM and CTE majors are mutually exclusive. Currently, the Compton Center has only CTE initiatives. Tables 4 and 5 outline the number of degrees and certificates awarded in CTE, STEM and SEM majors at ECC and the Compton Center.

At the two El Camino College locations, awarded counts have increased over the last five years. Within the last year, the percentage growth of CTE counts was more moderate, while STEM and SEM experienced a greater increase. Despite the varied percentage changes among the three initiatives at ECC, the increase in award counts are approximately the same.

**TABLE 4. El Camino College (Main Torrance Campus) – Degrees and Certificates Awarded by Initiative**

Initiative	Award Type	2006-07	2007-08	2008-09	2009-10	2010-11	1-yr change (%)
CTE	Degrees	462	450	446	463	480	4%
	Certificates	336	356	442	401	412	3%
STEM	Degrees	71	63	54	73	100	37%
	Certificates	18	31	21	15	20	33%
SEM	Degrees	45	38	37	52	79	52%
	Certificates	2	1	2	2	0	-100%

**TABLE 5. ECC Compton Center Degrees and Certificates Awarded by Initiative**

Initiative	Award Type	2006-07	2007-08	2008-09	2009-10	2010-11	1-yr change (%)
CTE	Degrees	48	42	62	81	88	9%
	Certificates	16	29	27	77	50	-35%
STEM	Degrees	2	0	1	2	2	0%
	Certificates	1	0	0	1	1	0%
SEM	Degrees	0	0	1	2	2	0%
	Certificates	0	0	0	0	0	0%

## DEMOGRAPHICS

The following section provides a demographic profile of students who were awarded degrees and certificates in 2010-11.

### Gender

**TABLE 6. Degrees and Certificates Awarded by Gender, 2010-2011**

	Main/Torrance				Compton Center			
	Degrees		Certificates		Degrees		Certificates	
	n	%	n	%	n	%	n	%
Males	548	39.2	205	49.5	58	27.5	17	33.3
Females	850	60.8	209	50.5	153	72.5	34	66.7
Unknown	1	0.1	0	0.0	0	0.0	0	0.0
<b>Total</b>	<b>1,399</b>		<b>414</b>		<b>211</b>		<b>51</b>	

Note: The count for Unknown is included for completeness.

Table 6 reveals that approximately 40% of degree earners at ECC were male, while 60% were female. The gender disparity was less apparent among certificate earners, where approximately 50% of males and females received awards. The difference among degree earners is greater compared to the overall ECC student population of 48% males and 52% females.

The gender profile of degree earners at the Compton Center was 28% male and 73% female. Similar to ECC, the gender difference among certificate students was smaller. Males comprised 33% while females constituted 67%. At the Compton Center, males and females comprised 36% and 64%, respectively. Compared to what their population suggests, males received degrees and certificates at a slightly lower rate.

## Age

**TABLE 7. Degrees and Certificates Awarded by Age Group, 2010-2011**

	Main/Torrance				Compton Center			
	Degrees		Certificates		Degrees		Certificates	
	n	%	n	%	n	%	n	%
19 or less	198	14.2	19	4.6	-	-	-	-
20 to 24	723	51.7	133	32.1	-	-	-	-
19 to 24	921	65.8	152	36.7	87	41.2	7	13.7
25 to 49	449	32.1	227	54.8	111	52.6	-	-
Over 49	29	2.1	35	8.5	13	6.2	-	-
25+	478	34.2	262	63.3	124	58.8	44	86.3
<b>Total</b>	<b>1,399</b>		<b>414</b>		<b>211</b>		<b>51</b>	

Note: Low student counts are suppressed to protect student privacy.

At ECC, two thirds of students who earned degrees (66%) fell in the younger age group (19 to 24), while students in the older age group (25+) comprised 35%. This age distribution is reversed among certificate earners, where older students (63%) were the majority. Compared to the campus population where the younger and older age groups comprise approximately 63% and 37%, respectively, 19 to 24 year olds are receiving certificates at a lower rate.

In contrast, among both degree and certificate earners at the Compton Center, the majority were 25 years and older. Approximately 41% of degree students were between the ages of 19 and 24, while 59% were 25 years old or older. The age gap is more apparent among certificate earners, with 14% falling in the younger age group and 86% in the older age group. At the Compton Center, there is a more even divide between the younger (56%) and older (44%) age groups. This indicates that younger students are earning degrees and certificates at a lower rate compared to what is suggested by their population.

## Ethnicity

**TABLE 8. Degrees and Certificates Awarded by Ethnicity, 2010-2011**

	Main/Torrance				Compton Center			
	Degrees		Certificates		Degrees		Certificates	
	n	%	n	%	n	%	n	%
Asian	328	23.4	62	15.0	-	-	0	0.0
African American	162	11.6	72	17.4	117	55.5	35	68.6
Latinos	469	33.5	159	38.4	67	31.8	13	25.5
American Indian	-	-	-	-	0	0.0	0	0.0
Pacific Islander	-	-	-	-	-	-	0	0.0
White	265	18.9	79	19.1	-	-	-	-
Two or More	17	1.2	-	-	-	-	0	0.0
Unknown	139	9.9	39	9.4	-	-	-	-
<b>Total</b>	<b>1,399</b>		<b>414</b>		<b>211</b>		<b>51</b>	

Note: Low student counts are suppressed to protect student privacy.

As outlined in Table 8, students self-identify by race and ethnicity. At ECC in 2010-11, the ethnic composition of students was fairly similar between those who received degrees and those who received certificates. Latinos were the most prominent group, receiving 33% of degrees and 38% of certificates. These awarding rates are similar to what their population suggests, which is approximately 31%. African Americans, however, received degrees (12%) at a lower rate than suggested by their population (approximately 18%). At the Compton Center, there were also small differences in the ethnic composition of degree and certificate earners. The two predominant groups were African American and Latino. Over the last several years, African Americans and Latinos comprised approximately 49% and 36% of the student population. Compared to the rates intimated by their population, African Americans earned degrees and certificates at a higher rate while Latinos received awards at a lower rate compared to their respective enrollment rates.

## **CONCLUSION**

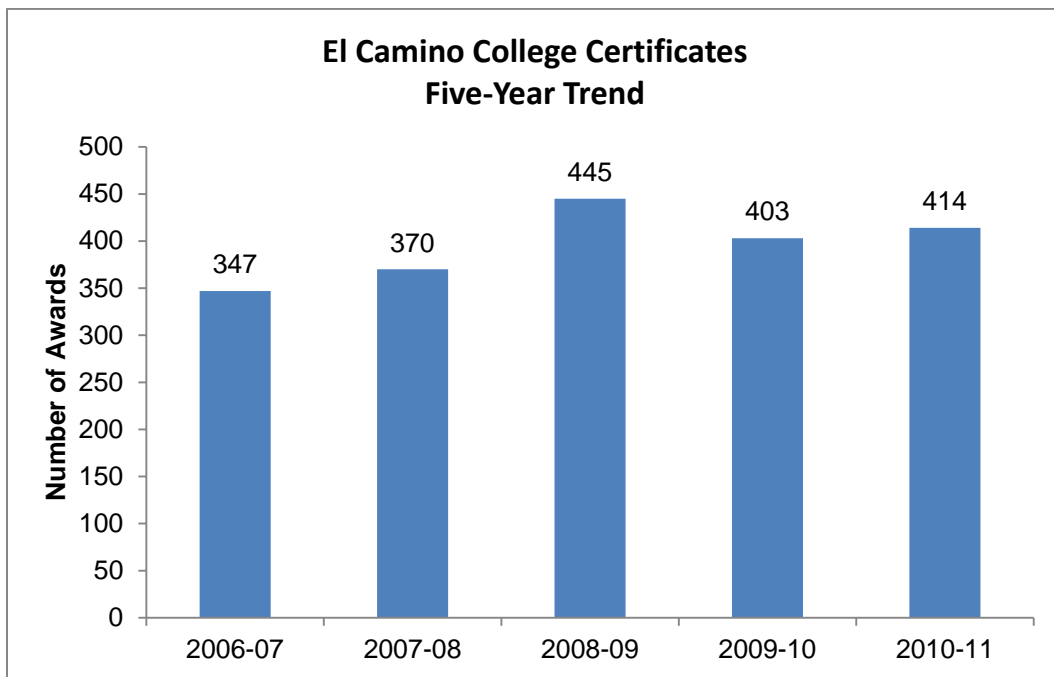

Recent patterns in degrees and certificates awarded provide insight regarding students' interests at the two ECC locations. Regarding the demographic characteristics of these students, a higher percentage of degree and certificate recipients are older and female at both locations.

Despite lower enrollments between 2006 and 2008, degrees and certificates awarded at ECC and the Compton Center have increased markedly during the last 5 years. The growth in enrollment starting in 2007-08 may influence an upswing in future award counts as these past cohorts approach the median time to completion. Additionally, the efforts of faculty and staff members through college initiatives have recently expanded. Such continuing and new initiatives include the Mathematics, Engineering, Science Achievement (MESA) Program; the Title V Graduation Initiative (GI); and the previously mentioned STEM and SEM programs. The intent of these initiatives is to increase graduation and transfer rates, particularly among Latino students. The recently-awarded Title V (Hispanic Serving Institutions) STEM (Science, Technology, Engineering, and Mathematics) grant, for instance, focuses on Latino students' academic success in STEM majors.
