Subject: Confirmed COVID-19 Cases at Compton College - December 3, 2020

Campus Community,

On ***Sunday, November 29, 2020***, Compton College received notification that an employee tested positive for COVID-19, the 2019 novel coronavirus disease. The employee was tested on ***Thursday, November 26, 2020***, and was confirmed to have COVID-19 on ***Saturday, November 28, 2020***. The individual's identity and personal information are considered confidential and may not be disclosed to protect this individual's privacy. Through our contact tracing, on ***Wednesday, December 2, 2020***, we confirmed the employee was last on campus on ***Wednesday, November 25, 2020***.

The [Los Angeles County Department of Public Health](#) had advised that individuals who test positive for coronavirus are deemed to be infectious two days before the test date or the date they first experienced symptoms. Compton College employees who may have been exposed to the affected individual have been identified and will receive notification this morning.

The [Compton CCD Pandemic Outbreak - Emergency Operations Plan](#) guides our response to the possible scenarios that may occur as the COVID-19 situation progresses. Compton CCD is still operating at **Level Four – Severe Infection Rate**. Compton College is presently offering alternative academic instruction and online student support services. I am in the process of sending communications to the campus community. The information regarding the confirmed case will also be posted on the college website. If you have any questions or concerns, please let me know.

Please be safe,

Keith Curry, Ed.D.
