**Subject:** Confirmed COVID-19 Cases at Compton College - December 14, 2020- Four Cases

Campus Community,

On **Tuesday, December 8, 2020**, Compton College received notification that a student tested positive for COVID-19, the disease caused by the 2019 novel coronavirus. Through our contact tracing, on **Friday, December 11, 2020**, we confirmed the student was last on campus on **November 25, 2020**. To protect this individual's privacy, the individual's identity and personal information are considered confidential and may not be disclosed. The individual experienced symptoms on **Wednesday, December 2, 2020**, interacted with a District employee off-site on **Thursday, December 3, 2020**, was tested on **Friday, December 4, 2020**, and was confirmed to have COVID-19 on **Saturday, December 5, 2020**. The [Los Angeles County Department of Public Health](#) had advised that individuals who test positive for coronavirus are deemed to be infectious two days before the test date or the date they first experienced symptoms. Under either test, the student was not infectious on **Wednesday, November 25, 2020**. The employee who the student interacted with on **Thursday, December 3, 2020**, has been notified. The District's contact tracing has determined that the employee was not a "close contact" and, in any event, did not interact with other Compton College students or employees during the month of **December 2020**. As a result, there is no need for any Compton College students or employees to self-quarantine at this time.

On **Wednesday, December 9, 2020**, Compton College received notification that a student tested positive for COVID-19, the disease caused by the 2019 novel coronavirus. Through our contact tracing, on **Sunday, December 13, 2020**, we confirmed the student was last on campus on **Tuesday, December 1, 2020**, and we confirm the student only visited the St. John's Health Center. To protect this individual's privacy, the individual's identity and personal information are considered confidential and may not be disclosed. The individual experienced symptoms on **Friday, December 4, 2020**, was tested on **Saturday, December 5, 2020**, and was confirmed to have COVID-19 on **Wednesday, December 9, 2020**. The [Los Angeles County Department of Public Health](#) had advised that individuals who test positive for coronavirus are deemed to be infectious two days before the test date or the date they first experienced symptoms. As a result, there is no need for any Compton College students or employees to self-quarantine at this time.

On **Friday, December 11, 2020**, Compton College received notification that an employee tested positive for COVID-19, the disease caused by the 2019 novel coronavirus. Through our contact tracing, on **Friday, December 11, 2020**, we confirmed the employee was last on campus on **Wednesday, October 14, 2020**. However, we did confirm the employee interacted with another employee during the week of **December 7, 2020**. To protect this individual's privacy, the individual's identity and personal information are considered confidential and may not be disclosed. The individual experienced symptoms on **Wednesday, December 9, 2020**, was tested on **Friday, December 11, 2020**, and was confirmed to have COVID-19 on **Friday, December 11, 2020**. Since the individual wasn't on campus while infectious, no impact on other members of the College community has been identified, except for the one employee who interacted with the employee at an off-site location. That individual has been identified and notified and will be required to self-quarantine for at least fourteen (14) days (i.e., through **Monday, December 21, 2020**). The [Los Angeles County Department of Public Health](#) had advised that individuals who test positive for coronavirus are deemed to be infectious two days before the test date or the date they first experienced symptoms.

On **Friday, December 11, 2020**, Compton College received notification that a student tested positive for COVID-19, the disease caused by the 2019 novel coronavirus. Through our contact tracing, on **Sunday, December 13, 2020**, we confirmed the student was last on campus on **Monday, November 30, 2020**, and we confirm the student only visited the St. John's Health Center. However, we also confirmed the student interacted with students and employees at an off-site location on **Friday, December 4, 2020**; however, all Compton College students and employees at that off-site location were observing social distancing, and none of the other District students and employees have been identified as "close contacts." To protect this individual's privacy, the individual's identity and personal information are considered confidential and may not be disclosed. The individual experienced symptoms on **Monday, December 7, 2020**, was tested on **Wednesday, December 9, 2020**, and was confirmed to have COVID-19 on **Friday, December 11, 2020**. The [Los Angeles County Department of Public Health](#) had advised that individuals who test positive for coronavirus are deemed to be infectious two days before the test date or the date they first experienced

symptoms. As a result, there is no need for any Compton College students or employees to self-quarantine at this time.

It's important to know that COVID-19 transmission is thought to spread mainly between people who are in close contact with one another (within about 6 feet), and through respiratory droplets when an infected person coughs, sneezes, or talk. It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes. To learn more about this, click [here](#).

If you experience symptoms such as fever, cough, or shortness of breath, refer to the Centers for Disease Control and Prevention "What To Do If You Are Sick" information, which is available [here](#), and contact your health care provider, or the St. John's Student Health Center by calling 323-541-1411 if you have questions, concerns, or would like to make an appointment to visit a clinic.

You may also call the Los Angeles County Department of Public Health directly at 213-240-7941 (Monday-Friday, 8:00 a.m.-5:00 p.m.) or 213-974-1234 (after hours) and follow their instructions:

- Diligently follow best hygiene practices, including washing your hands often with soap and water for at least 20 seconds, using hand sanitizer, covering coughs and sneezes with tissues, avoiding touching your eyes, nose, and mouth, and avoiding close contact such as shaking hands.
- If you live with someone, maintain social distancing by staying at least six feet away, and do not share utensils and other personal items.
- If you live with someone who exhibits these symptoms now or in the future, he or she must also self-isolate for a total of 14 days from the onset of symptoms.

Included with this letter are additional resources from the Los Angeles County Department of Public Health: [What If I'm Exposed](#) and the [Frequently Asked Questions \(FAQs\)](#). Please follow these guidelines closely, both for yourself and for your loved ones. Your health and well-being are our priority. If a student or employee tests positive, please follow these communication protocols:

- Students should contact their instructor via email as soon as possible and provide additional information\*. The instructor will then contact the Compton College Pandemic Coordinators ([rbox@compton.edu](mailto:rbox@compton.edu), [rjames@compton.edu](mailto:rjames@compton.edu), [hparnock@compton.edu](mailto:hparnock@compton.edu), and [rsasser@compton.edu](mailto:rsasser@compton.edu)) and call Human Resources at ext. 2400.
- Employees are to contact the Pandemic Coordinators ([rbox@compton.edu](mailto:rbox@compton.edu), [rjames@compton.edu](mailto:rjames@compton.edu), [hparnock@compton.edu](mailto:hparnock@compton.edu), and [rsasser@compton.edu](mailto:rsasser@compton.edu)) via email as soon as possible and provide additional information\* and call Human Resources at (310) 900-1600 ext. 2400.
- \*Additional information includes: full name, Compton College student ID if applicable, when you tested positive, when and where you were last on campus, and include the list of classes you are enrolled in or teaching this semester.

The [Compton CCD Pandemic Outbreak - Emergency Operations Plan](#) guides our response to the possible scenarios that may occur as the COVID-19 situation progresses. Compton CCD is operating at **Level Four – Severe Infection Rate**. Please visit the Compton College COVID-19 webpage [here](#) for updates.

Sincerely,

Keith Curry, Ed.D.
