Reference:

Accreditation Standard IV. C.10

The Board of Trustees is committed to assessing its own performance as a Board of Trustees in order to identify its strengths and areas in which it may improve its functioning. To that end, the Board of Trustees has established the following processes.

- Once a year, the Board of Trustees will conduct a self-evaluation.
- The evaluation instrument will incorporate criteria based on the Board policies regarding Board of Trustees operations, as well as criteria defining Board effectiveness based on Board determined goals and objectives.
- Board members will complete the evaluation instruments and submit them to the President/Chief Executive Officer prior to July 31.
- The evaluation results will be presented and discussed at the August Board meeting.
- The evaluation results will be used to identify accomplishments in the past year and goals for the following year.
