Title 5 §§55060, et seq., 55521

Health and Safety Code §128050

Compton College's California Board of Registered Nursing approved Associate Degree in Nursing (ADN) Program accepts baccalaureate or higher degrees from accredited colleges and universities as evidence of fulfillment of general education requirements as required for an associate degree. These students will complete coursework specific to attaining licensure as a registered nurse and are exempt from additional ADN Program course requirements. Prerequisite science courses must meet the recency clause of not exceeding seven years and demonstrate a cumulative grade point average of greater than 2.50 or higher. Required prerequisite science courses that have been completed more than seven years ago must be re-taken.

The District shall utilize criteria published on the nursing program's website and in the current college catalog in addition to the following when screening nursing students:

- Academic degrees or diplomas, or relevant certificates, held by the applicant;
- Grade point average in relevant coursework;
- Life experiences or special circumstances of an applicant;
- Any relevant work or volunteer experience; and
- Achievement of a successful passing score on the ATI TEAS examination.

Nursing students are subject to all policies, regulations, and guidelines outlined in the Associate Degree Nursing (ADN) Student Handbook published by the Compton College Nursing Program.
