Physical Plant Management is dedicated to the maintenance of the campus's physical environment. The Facilities Planning and Operations Department, as the stewards of the buildings and grounds on our 88-acre campus, is the single point of contact for all service and maintenance requests from our student, faculty, staff, and the neighboring community. Facilities Planning and Operations' staff evaluate and prioritize customer service requests and work to ensure the standards for safe, high-quality and cost-effective physical plant management. The Facilities Planning and Operations department also provides asset management and shipping/receiving assistance to the District.

Physical Plant Management is a part of the goals and objectives recommended in Compton College's Comprehensive Master Plan.
