

Support Equity and Engagement!

Reading Apprenticeship Workshop Series

This zoom series will introduce you to the Reading Apprenticeship framework as a support for creating more active and equitable learning environments in any discipline. Over a series of four synchronous online workshops, participants will:

- Gain experience identifying and leveraging their own expertise reading the texts (problems, graphs, proofs, narratives, images, etc) of their discipline, in order to better support students' disciplinary reading and problem solving
- Plan, execute, and reflect on text-based lessons that engage students in metacognitive inquiry and support deep learning
- Engage as a supportive community of practitioners focused on improving their practice

Session Schedule

Participation in the series requires committing to all four workshops. Each session will be two hours long, from 12:00-2:00pm on the following dates:

1. **March 26:** *Situating Reading Apprenticeship in the science of how learning works*
2. **April 2:** *Why Metacognitive Conversation?*
3. **April 23:** *Reading Apprenticeship as Equity Pedagogy*
4. **May 21:** *Making it Real: Planning to integrate Reading Apprenticeship*
